| · Pyrotechnician, Special Effects | 2006 | · ADR training | · First aid training |

DIRECTOR, WRITER, PRODUCER, COMMUNICATIONS COORDINATOR

I'm a Finnish filmmaker, media production and communications professional based in Southern Finland.

I have studied film and media in the Turku Art Academy and in the renowned FAMU film school in Prague. Additionally I'm a Set Designer artisan with a Master's degree and a licensed professional special effects technician. I have studied Information Science at Masters level at the Turku University.

My speciality is directing and screenwriting, but I'm also proficient in production work. As a director I strive for a strong artistic viewpoint, enjoying subversion and discussing strong themes; as a leader I'm dedicated to the welfare of the crew and staying within schedule and budget. I understand the realities of production and marketing, can coordinate extensive projects and manage fluent internal and external communications. I understand various target medias and audiences, being able to modify the message as needed. I have superb IT skills ranging from office packages to film and specialist 3D VFX software. I have significant international experience over Europe, Asia and Scandinavia. I can both lead a team and work as a dedicated member of the crew. I plan meticulously, but can also improvise quickly when needed.

I'm interested in all kinds of arts from painting to pottery, dabble in amateur theater, enjoy sports from circus to martial arts, and like traveling: scuba diving in warm waters and sailing historical ships.
